Blitar, East Java

Results-oriented graduate in Software Engineering with a keen interest in programming, particularly in frontend development. Currently employed as a frontend developer at PT Infosys Integrated Solutions, where I am responsible for enhancing functionality by spearheading feature development, seamlessly integrating APIs, and adeptly resolving software disruptions.

Work Experiences

PT. Infosys Solusi Terpadu, Jakarta | Frontend Developer | 07/2023 - Present

- Collaborated closely with the design team to integrate the latest design elements and enhance the overall user experience.
- Worked collaboratively with the backend team to ensure seamless integration between frontend and backend, optimizing the overall performance of the application.
- Managed the project development lifecycle from planning to implementation, adhering to set deadlines.

PT. Artcak Teknologi Indonesia, Surabaya | Fullstack Developer | 08/2022 - 11/2022

- Developed a Software as a Service (SAAS) web application named Erpro using PHP and the Laravel framework, which is utilized by over 15 providers in Indonesia.
- Created a responsive landing page using HTML/CSS.

PT. Artcak Teknologi Indonesia, Surabaya | Quality Assurance Intern | 06/2022 - 08/2022

- Understood system specifications, documentation, and compiled testing reports.
- Performed manual testing on mobile and web applications utilized by over a thousand users.

Education Background

Information Systems, 2023 - Present
Universitas Terbuka, Indonesia

Diploma Degree in Software Engineering, Graduation Year 2023
Vocational High School Telkom Malang, Indonesia
Grade: 90.2 / 100

Projects

Explore a collection of my project portfolio by following this [link](#), highlighting a range of undertakings. From my final school assignment to self-initiated projects, I primarily utilized HTML/CSS and the Vue.js framework to build impactful and dynamic solutions.

Organizational Experience

UT Insider, Jakarta | Contributor | 09/2023 - Present

UT Insider is a university community that brings together students majoring in Information Systems (SI) and System Design (DSI) to collaborate on the development and improvement of systems.

- Collaborate with experienced team members and cross-functional departments to attain shared objectives.

PALWAGA, Malang | Secretary | 10/2021 - 10/2022

PALWAGA is one of the sub-organizations at SMK TELKOM MALANG that deals with caring for nature.

- Ensured the smooth and efficient operation of the organization by organizing task assignments, managing attendance records, preparing activity proposals, and assisting the chairperson in decision-making processes.
